

AI Consultants for Nonprofits offers AI training programs to nonprofits interested in implementing AI into its operations.

Our workshops provide an overview of AI terminology, business benefits, types of AI including generative models, data needs, and ethical considerations.

Participants gain practical knowledge to apply AI techniques through customized use cases relevant to your mission and/or industry.

- AI Terminology & Trends
- Business Value of AI
- AI Ethics and Responsible Use
- Types of AI
- Natural Language Processing and Building Your Own Data Sets
- Generative AI and Creative Applications
- Prompt Engineering
- Group Breakouts - Applying AI to Use Cases
- Building an AI Strategy
- Building an AI Team
- Q&A and Next Steps

**Deliverables:**

- 3-hour AI training session
- Presentation slides
- Handouts
- Recording of the training session (if virtual)
- Specific relevant use case examples

To maximize the impact of the AI training, we recommend complementing the introductory session with customization and follow-up coaching.

The 1:1 coaching sessions can help participants apply the knowledge to specific use cases and projects. Ongoing coaching packages provide continued support for strategy and implementation.

Customized training content and models will tailor the learning to a nonprofit's unique needs.

The assessment and recommendation plan will evaluate the current state, readiness for AI, and provide a roadmap for effective AI integration after the initial training.

These additional services will enable participants to gain proficiency in AI applications relevant to their work.

### Additional Services:

- Customization of training content and models with assessment and recommendation plan: \$1,500/one time
- 1:1 coaching sessions: \$500/hour
- Ongoing coaching packages:
  - 4 sessions per month for 3 months: \$2,000/month
  - 8 sessions per month for 6 months: \$3,600/month

### About AI Consultants for Nonprofits

AI Consultants for Nonprofits is a provider of artificial intelligence training, coaching, and consulting, integration and certification services for the nonprofit sector, higher education and companies with a social mission. Our team of AI experts is dedicated to helping mission-driven organizations use AI to create a culture where AI takes on the grind and people can get back to the essence of what they love.

As nonprofit professionals, we understand the unique challenges and opportunities of integrating emerging technologies into the work of social good. That's why we offer AI solutions tailored to your specific needs.

Our clients benefit from our hands-on approach centered around capability-building. We don't just tell you about AI - we enable your team to develop the confidence and skills to deploy AI responsibly.

With a focus on practical application, we help nonprofits use AI to:

- Gain insights from data to refine programs and services
- Automate tasks to improve efficiency
- Personalize supporter experiences
- And much more

Our services include:

- Interactive workshops and training sessions to build AI knowledge
- Custom implementations with real-world data and use cases
- Ongoing coaching and support for adopting AI
- Impact assessments to maximize AI for social good
- Licensing and certification

As a trusted partner, we guide organizations at every step of their AI journey - from strategic planning to application to evaluation.

### **Additional Questions:**

#### **How long are training sessions?**

Our half-day sessions are scheduled for up to 3 hours and our full-day training is up to 7 hours. This provides sufficient time to cover key concepts, content and activities while keeping the training focused.

#### **What if I need less than 3 hours of training?**

Training less than our 3-hour package is billed as a customization at \$1,500 up to 90 minutes. It includes training content on specific use cases.

#### **What is included in the flat rate for travel?**

To simplify budgeting for in-person events, we bill travel expenses at a flat rate of \$800 for one trainer and \$1,450 for two trainers. Rate includes flights, lodging, transportation and per diem.

#### **Is there a reduced rate for virtual presentations?**

No. We provide the expertise whether the training is in-person or virtual. Our fees reflect the value of the intellectual capital, customization, and ongoing support.

**Do you offer a train-the-trainer option?** Yes, we can provide a train-the-trainer license with our accredited certification. This enables us to train an internal staff member to become a resident AI expert able to deliver ongoing training – which includes access to our resources Contact us for pricing and details.
